

World Military Expenditures and Arms Transfers 1997

The main Arms Transfer Tables (II-V) of WMEAT 1997 are being shown on the ACDA Home Page as they are completed to expedite information availability. The final report will include all tables as well as additional highlights and other features.

NOTE:

US arms exports in dollar terms in Main Arms Transfer Tables II, III, and IV of WMEAT 1997 have been revised upward significantly from previous editions, with new estimates for a major component, commercial arms sales. See the article, "Revision of US Arms Export Data Series."

Highlights (abbreviated) to Arms Transfer Tables II, III, and IV

Table II. Value of Arms Transfer Deliveries and Total Trade, 1986-1996, by Region, Organization, and Country

Table III. Value of Arms Transfer Deliveries, Cumulative 1994-1996, by Major Supplier and Recipient Country

Table IV. Value of Arms Transfer Deliveries and Agreements, 1986-1996, by Major Supplier and Recipient Region

Table V. Number of Major Weapons Delivered to Regions and Groups, Cumulative Periods 1985-1996, by Supplier and Weapon Type.

Country Rankings: Arms Exports, Arms Imports, and Related Ratios

Revision of US Arms Export Data Series

With the *WMEAT 1997* edition, the data series on US arms exports in dollar value terms is revised upward substantially using a new interim methodology, in the interest of improved accuracy. The revision was made in one of the two major component types of exports, namely, the “commercial” arms sales made directly by US firms to foreign importers under authorization of the Department of State in accordance with the US Government’s International Traffic in Arms Regulations. The other major type is exports under the “Foreign Military Sales” (or FMS) program administered by the Department of Defense, which serves as an intermediary in transfers to other governments. After the present data revision, commercial exports made up 52% of total US arms exports over the past decade, FMS sales, 47%, and several minor types of exports, one percent.

In the previous methodology, the commercial arms component was represented by “preliminary” data on the deliveries (or actual exports) made under approved export licenses, as compiled by the Department of State.¹ Due to growing difficulties in the availability, reporting, and recording of this data (which passes on State-approved licenses from exporting firms to the US Customs Service and back to State and its databank), this data series has become unacceptably incomplete and provides an inadequate measure of the full volume of such exports.

A fully satisfactory replacement for this data series, however, is not available at the present time, either in the form of an alternative series or a reasonably reliable estimate of actual deliveries. Therefore, pending the establishment of reliable recording of actual commercial exports, the US arms exports data series in this edition of *WMEAT* incorporates an *estimated* data series employing an *interim* methodology, which is to be replaced in an early successor edition with a more satisfactory solution based on ongoing research efforts.

In the temporary estimate of total US arms exports used in this edition, the commercial component is estimated from the only other data series available, the value of approved arms export licenses and authorizations issued by the Department of State.²

Approved licenses for commercial arms exports generally should be strongly indicative of actual exports, since license applications must be accompanied by evidence of concluded sales, such as signed contracts, purchase orders, or letters of intent. However, the real relationship between commercial deliveries and authorizations—that is, the exact extent to which authorizations result in actual exports—is uncertain, and the scarce empirical evidence presently available is inadequate for sound estimating purposes. In the interim, therefore, it is assumed as a temporary expedient that deliveries constitute a medial 50 percent of total authorizations by country. These deliveries are then distributed in a fixed pattern over the years of license duration, which changed during the past decade from three years to four.

Efforts are currently underway, with the collaboration of the Department of State, to acquire sufficient empirical evidence for a more reliable method of estimating actual commercial exports from authorizations. This method will then be used in *WMEAT* until a fully reliable system of reporting of actual deliveries is in place.

The table below shows US commercial arms exports in three forms: reported (“preliminary” or partial) deliveries, total approved licenses and authorizations (both as reported by the Department of State), and the present estimate of deliveries based on 50 percent of authorizations, distributed over license duration. Also shown is the ratio (in percent) of partial deliveries to authorizations.

¹ These data can be found in the annual *Congressional Presentation for Foreign Operations*, prepared by the Departments of State and Defense, and in the Defense Security Assistance Agency’s *Foreign Military Sales, Foreign Military Construction Sales and Military Assistance Facts as of September 30, 19—*.

² Reported to the Congress under Sections 36(a)(4) of the Arms Export Control Act and Section 655 of the Foreign Assistance Act. The Section 36 report shows the total value of approved licenses (for defense articles) by recipient country, and the Section 655 report, initiated in 1997, also shows agreements (for defense services) and defense articles by type.

US Commercial Arms Exports, Alternative Series, 1986-1996

(In millions of current dollars)

Fiscal Year	Reported (Partial) Deliveries	Authorizations	Ratio, Reported Deliveries to Authorizations (%)	Estimated Deliveries (At 50%)
1986	3,678	14,727	25.0	6,150
1987	6,436	14,578	44.2	6,840
1988	4,637	19,155	24.2	8,220
1989	8,165	21,181	38.6	9,530
1990	6,064	33,041	18.4	12,800
1991	5,039	39,899	12.6	16,200
1992	2,563	15,817	16.2	14,200
1993	3,806	25,796	14.8	12,100
1994	3,332	25,394	13.1	11,800
1995	2,759	19,234	14.3	10,100
1996	1,077	26,802	4.0	10,600

Note: These data are total exports to the “world” as in *WMEAT*, and are slightly smaller than global totals due to the omission of some very small recipients.

It should be noted that the data on authorizations through 1995 covers only licenses for defense articles. Data on agreements for defense services (for manufacturing and technical assistance) are available and included beginning with 1996. These agreements are usually valid for longer periods than licenses, a difference that is ignored in the present method.

The newly estimated interim commercial exports series is confidently believed to be more accurate than the previous series. However, in view of the less-than-desirable present supporting information, it should be kept in mind that considerable uncertainty attaches to the new commercial and the resulting total arms export series, and both are subject to further change in succeeding editions when adequate information becomes available. The new methodology has a substantial effect on the total US arms export series; it is 45 percent higher on average for the 1986-1996 decade, and nearly 60 percent higher for 1990-1996.

It should also be noted that there is some uncertainty regarding the comparability of (total) US arms

exports data with the estimates used for the exports of other countries. Although comparable in conceptual scope, the latter estimates are based on US Government sources, which may not be able to capture the full extent of small arms, spare and production parts and components, and defense services exported by these countries. The question is not believed to be serious under the present temporary methodology, which is thought more likely to underestimate than overestimate commercial deliveries, and thus total US exports. The expected availability of data on the full extent of US commercial exports of defense articles and services will make this question more acute.

The use of data on the value of other-country arms exports as published by sources in those countries is of little assistance in this regard because not all major exporting countries regularly release such data, and when they do, the scope and content of the reported arms exports is not adequately revealed or known. These issues are also currently under investigation.

WMEAT 1997: Main Arms Transfer Tables II, III, and IV

HIGHLIGHTS

Figure 1. World Arms Trade, 1986-1996

(billions of constant 1996 dollars)

The volume of the world arms trade, \$42.7 billion in 1996, continued to edge upward from its 1994 post-cold-war low, increasing by \$2 billion from the previous year. The increase was the result of a \$3 billion rise in imports by the developed group of countries, while imports of the developing group dropped slightly by \$1 billion.

NOTE:

US Arms exports in dollar terms in Main Tables II-IV of *WMEAT 1997* have been revised upward significantly from previous editions, with new estimates for a major component, commercial arms sales. See the article, "Revision of US Arms Export Data Series," on the ACDA website under *WMEAT 1997*.

The preeminence of the developing country group as importers of arms, traditional in view of their large number and paucity of domestic arms producing industries, diminished markedly with the steep decline in their imports after the 1987 peak, while imports of the developed group remained fairly level (see Figure 1). In the years 1991-1994, the two groups approached equality in arms imports. The difference widened somewhat in 1995 and narrowed again in 1996.

At the same time, the traditional dominance of the developed group as exporters of arms has increased, with their share of the world total rising from 94% in 1986 to 97% in 1996 (Table 1). The US became the leading arms exporter in 1990, with a 39% share of the world total. This share reached 60% in 1992-1993 (with the demise of the Soviet bloc and the aftermath of the Gulf War), dropping to 55% in 1996.

These general trends were evident in previous editions of this report, but are more pronounced in this edition because of the use of a newly estimated and upwardly revised data series on US arms exports. The revision results from a new interim estimate for a major component of the US total, namely, "commercial" arms exports. Readers should be aware that the new interim series for US arms exports, while an improvement over the previously published series, is a temporary one pending the acquisition of a better data and a sounder series on commercial exports in future editions. (See the article, "Revision of US Arms Export Data Series", on this ACDA website under *WMEAT 1997*.) The US arms exports series has increased especially since about 1990, with the additional exports going primarily to US allies and other developed countries, thus augmenting the trends cited above.

The pattern of US arms exports to the world is markedly different from that of most other arms exporters. Figure 2 shows that the US is primarily a supplier of arms to developed countries. US

* Average annual rate, calculated as a compound rate curve fitted to all points (see Statistical Notes for details).

exports to developed countries in 1996 were 33% of world trade and 61% of total US arms exports. Most of this amount, 80%, went to fellow NATO members and other close allies Japan, Australia, South Korea, and Israel. Developed countries got 75% of their arms imports from the US.

On the other hand, the developing countries imported most of their arms, 61%, from non-US suppliers. The non-US group exported 76% of

Figure 2. World and U.S. Arms Trade Patterns, 1996

(Amounts in billions of dollars; shares in percent)

their arms to developing countries, or 34% of the world trade. In exception to this pattern, two of these exporters, Germany and Canada, resembled the US in exporting more to developed than to developing countries.

Other notable findings

- North America and Western Europe accounted for 85% of the world's arms exports in 1996. Eastern Europe provided an additional 9%, much lower than its 47% share a decade earlier. (See Table 1.)
- Five of the world's regions, including South America, were virtually out of the market as exporters, with a zero share in 1996.

- US exports in 1996 were nearly four times those of the next largest, the United Kingdom. The top ten exporters in 1996, with 94% of the world total, were:

		billion \$	% of total
1	United States	23.50	55
2	United Kingdom	6.10	14
3	Russia	3.30	8
4	France	3.20	8
5	Sweden	1.20	3
6	Germany	.83	2
7	Israel	.68	2
8	China-Mainland	.60	1
9	Canada	.46	1
10	Netherlands	.34	<1

- The top arms exporters to the developing groups of countries in 1996 were:

		billion \$	% of world
1	United States	9.2	39
2	United Kingdom	5.6	24
3	Russia	2.8	12
4	France	2.1	9
5	China-Mainland	.6	3
6	Israel	.4	2
7	Canada	.2	1

- Three importing regions accounted for over 80% of the world market in 1996: the Middle East (38%), East Asia (22%), and Western Europe (21%). These regions made up under 60% in 1986, when Eastern Europe and South Asia had larger shares (see Table 2).
- East Asia's arms imports, already large, grew at a 5% annual rate in the latter half of the decade. Because of very low starting levels, imports also grew sharply during that period in the Central Asia and Caucasus region and in Eastern Europe.
- Saudi Arabia was by far the largest arms importing country in 1996. The top ten, accounting for 57% of the total, were:

		billion \$	% of world
1	Saudi Arabia	9.8	23
2	Japan	2.4	6
3	China-Taiwan	2.0	5
4	Egypt	1.8	4
5	Kuwait	1.7	4
6	China-Mainland	1.5	4
7	United Kingdom	1.5	4
8	Turkey	1.4	3
9	Australia	1.3	3
10	South Korea	1.1	3

- Over the three-year period 1994-1996 (see Main Table III), the top six arms exporters and their share of world and developing country imports were as follows:

billion % of % of
dollars world developing

1	United States	67.3	56	42
2	United Kingdom	16.4	14	22
3	Russia	8.5	7	11
4	France	6.7	6	7
5	Germany	4.0	3	2
6	China	2.0	2	3

- In that same 1994-1996 period, the main arms importers, their share of world imports, and the share of their imports supplied by the United States, were as follows:

		billion dollars	% of world	% from US
1	Saudi Arabia	26.6	22.2	44
2	Japan	6.0	5.0	100
3	Egypt	5.7	4.7	67
4	Turkey	5.0	4.2	64
5	South Korea	4.8	4.0	67
6	China-Taiwan	4.1	3.4	81
7	United Kingdom	3.6	3.0	98
8	Australia	3.5	2.9	51
9	Kuwait	3.4	2.8	56
10	United States	3.3	2.8	0
11	Israel	2.9	2.4	91
12	Germany	2.7	2.3	96
13	China-Mainland	2.6	2.1	5
14	United Arab Emir's	2.2	1.9	35
15	Malaysia	2.0	1.7	18
16	Greece	1.8	1.5	62
17	Thailand	1.7	1.4	64
18	Spain	1.7	1.4	83
19	Netherlands	1.6	1.3	96
20	Italy	1.4	1.2	92

The data illustrate that in 1994-1996 several NATO and other allies who were leading world arms importers obtained their arms mainly from the United States, while developing countries Saudi Arabia, Malaysia, and Mainland China were less reliant on the US. This pattern resembles that for 1996 alone, as shown in Figure 2 above.

Released December, 1998

**TABLE II. Arms Transfer Deliveries and Total Trade, 1986-1996
By Region, Organization, and Country — continued**

E Estimate based on partial or uncertain data. 0 Nil or negligible (\$2.5 million or less). NA Not available.

- a To avoid the appearance of excessive accuracy, arms transfer data by country are rounded, with greater severity for larger amounts. All country group totals for arms exports and arms imports shown here are the sums of rounded country data, except for world totals, which are the rounded sums of unrounded country data. This exception is made to preserve the equality of world arms exports and world arms imports; the rounded country data produce unequal world summations.
- b Total imports and exports usually are as reported by individual countries and the extent to which arms transfers are included is often uncertain. Imports are reported "cif" (including cost of shipping, insurance, and freight) and exports are reported "fob" (excluding these costs). For these reasons and because of divergent sources, world totals for imports and exports are not equal.
- c Because some countries exclude arms imports or exports from their trade statistics and their "total" imports and exports are therefore understated and because arms transfers may be estimated independently of trade data, the resulting ratios of arms to total imports or exports may be overstated and may even exceed 100 percent.
- d In order to reduce distortions in trends caused by occasional data gaps, the totals for the world, regions, and organizations include rough approximations for those countries and years in which data are not available, and available data for years in which countries were not independent.
- e Includes US transfers to NATO agencies as such and to other international agencies and classified transfers, which are not attributable to individual recipient countries.
- f Germany (The Federal Republic of) was known as West Germany through 1990, when data for East Germany ended.
- g Includes major equipment purchased by the US Army Corps of Engineers for use in military construction projects in Saudi Arabia, recorded in US accounts as US imports.
- h US arms exports in dollar amount terms in Main Tables II-IV of *WMEAT 1997* have been revised upward significantly, due to use of new estimates for a major component, commercial arms sales. See the article, "Revision of U.S. Arms Export Data Series," on the ACDA website under *WMEAT 1997*.
- i The Yemens became unified on May 22, 1990. Arms purchases made by unified Yemen following this date are shown under Yemen (Sanaa).

NOTICE: Table III was replaced on 1/29/99; the Total and United States columns were incorrect in the version placed here on 12/23/98.

**TABLE III. Value of Arms Transfer Deliveries, Cumulative 1994-1996
By Major Supplier and Recipient Country — continued
(In Millions of Current Dollars)**

@ Developed country (all others are "developing").

OPEC country

X Not applicable.

0 Nil or negligible (\$2.5 million or less), except that where "Supplier" (other than U.S.) and "Recipient" are single countries, "0" may represent amounts up to \$50 million. (See last line under each region for total amount not distributed by individual recipient.)

NOTE: To avoid the appearance of excessive accuracy, the entries in this table are independently rounded, with greater severity for larger numbers. Totals here are the sum of the rounded components.

- a Comparable totals in Tables III and IV do not agree precisely due to the fact that rounding was done at different stages of aggregation.
- b US arms exports in dollar value terms in Main Tables II-IV of *WMEAT 1997* have been revised upward significantly due to use of new estimates for a major component, commercial arms sales. See the article, "Revision of U.S. Arms Exports Data Series," on the ACDA website under *WMEAT 1997*.
- c US arms transfers to the World, Developed, and Developing groupings include transfers to NATO agencies as such and to other international agencies and classified transfers, which are not attributed to individual recipient countries or regions.
- d Includes major equipment purchased by the US Army Corps of Engineers for use in military construction projects in Saudi Arabia, recorded in US accounts as imports to the US. These purchases, not attributable to individual supplier countries, are included under "Others".

**TABLE IV. Value of Arms Transfer Deliveries and Agreements, 1986-1996
By Supplier and Recipient Region — continued
(In Billions of Current Dollars)**

— \$3 to 50 million. 0 Nil or negligible (less than \$3 million).

- a Comparable totals in Tables III and IV differ slightly due to the fact that rounding was done at different stages of aggregation. The entry in the World column in Table IV exceeds the sum of the components in some rows due to certain imports by Saudi Arabia that cannot be attributed to specific suppliers. See Table II, footnote g.
- b US arms exports in dollar value terms in Main Tables II-IV of *WMEAT 1997* have been revised upward significantly due to use of new estimates for a major component, commercial arms sales. See the article, "Revision of U.S. Arms Exports Data Series," on the ACDA website under *WMEAT 1997*.
- c The estimated dollar value of the Soviet Union's arms exports in this and the previous six editions are revised and are substantially larger than those in earlier editions. For further discussion, see Statistical Notes, Arms Transfers.
- d US arms transfers to the World, Developed, and Developing groups include those to NATO agencies as such and to other international agencies and classified transfers, which are not attributed to individual recipient countries or regions.

WMEAT 1997: Table V – Number of Major Weapons Delivered

To expedite information availability, the Main Statistical Tables of World Military Expenditures and Arms Transfers 1997 are being placed on the ACDA Home Page as they are completed. The final report will include all tables as well as additional Highlights, other standard features, and special analyses.

Major Weapon Transfers, by Group and Period, 1986-1996 (in Units)

The number of major weapons transferred worldwide declined by nearly 60% over the last decade. The drop was steady in all four main groupings of weapons, with the exception of increases in naval craft and missiles in the most recent period, 1994-1996. Transfers by weapons type and period were as follows (in units):

1985-87 '88-90 '91-93 '94-96

Land Armaments

Tanks	5,778	5,038	3,407	2,748
Artil., Field and Anti-Air	20,779	16,930	13,212	2,544
Armored Pers. Carriers	12,613	7,504	5,079	9,417

Naval Craft

Major Surface Combatants	39	28	26	55
Other Surface Combatants	307	311	196	299
Submarines	22	18	8	2
Missile Attack Boats	1	9	5	22

Aircraft

Combat Aircraft, Supers.	1,375	1,486	875	564
Combat Aircraft, Subsonic	232	212	212	252
Other Aircraft	2,340	1,874	1,128	601
Helicopters	1,483	1,000	568	805

Missiles

Surface-to-Air	24,851	17,632	7,663	11,801
Surface-to-Surface	1,070	2,140	350	0
Anti-Ship	1,515	1,455	503	746
Total, all types	72,405	55,637	33,232	29,856

The reductions occurred mainly in the first three periods, with most weapon types tending to level off or increase in 1994-1996. In land armaments, a turnup in transfers of armored personnel carriers took place in the latter period, whereas steady though modest reductions occurred in tanks and steeper ones in artillery. In naval craft, the upturn was in major surface combatants and missile attack boats, while others surface combatants and submarines continued to decline. In aircraft, subsonic combat aircraft and helicopters, transfers also rose in 1994-1996, in contrast to supersonic combat and other aircraft which continued their steady decline throughout the whole period. In missiles, surface-to-air and anti-ship missiles declined until the last three-year interval, while surface-to-surface missiles dropped to zero.

The main suppliers of major weapons to the world in 1994-1996 ranked as follows (with total weapon exports):

United States	8,580	Germany	2,172
France	5,618	United Kingdom	994
Russia	4,255	China	892

Other NATO countries delivered 2,159 units, other former Warsaw Pact countries, 1,895, other developing, 2,406, and other developed, 794.

In terms of weapon type, the United States led the 1994-1996 period in deliveries of tanks (50% of the total), armored personnel carriers (35%), supersonic aircraft

Suppliers of Major Weapons to the World: 1994-1996

Surface-to-Air	11,801	19	13	3	44	—	2	—	5	1	13
Surface-to-Surface	0	—	—	—	—	—	—	—	—	—	—
Anti-Ship	746	61	—	—	15	—	24	—	—	—	—

(40%), subsonic aircraft (60%), helicopters (38%), and anti-ship missiles (61%). Russia led in terms of smaller surface combatants (51%) and missile attack boats (100%), while Germany led in terms of major surface combatants (45%), France, in surface-to-air missiles (44%), and China, in submarines (86%).

Importers of major weapons were mainly the developing countries, with 65% of total 1994-1996 transfers. In terms of regional imports, the Middle East, with imports of 8,903 major weapons, and Western Europe, with 8,269, far out-purchased the rest of the world, followed by East Asia (3,271), South America (2,599), Subsaharan Africa (2,130), South Asia (1,923), and Eastern Europe (1,362). All other regions of the world imported less than 1,000 units.

Of all major weapons imported by Middle East countries in 1994-1996, 78% were land armaments, mostly armored personnel carriers and armored cars (65% of these provided by the United States). Another 15% of all imported weapons were missiles, mostly surface-to-air, with again roughly 65% from the United States.

In Western Europe, missiles, mostly surface-to-air from France, made up 58% of major weapon purchases in 1994-1996. Land armaments, over half being armored personnel carriers and cars, mostly from Germany, made up another 39% of the total, while aircraft made up another 5%, with roughly half coming from the United States.

Imports to other regions were as follows: in East Asia—missiles made up 60% of the total, land armaments, 25%, and aircraft, 15% (in all cases the United States being the major supplier); in South America—missiles made up 74% of the total (mostly from Russia and other former Warsaw Pact countries), land armaments, 17%, and aircraft, 9% (United States); in Subsaharan Africa—missiles made up 52% of the total (mostly from Russia and other former Warsaw Pact countries), land armaments, 39% (Russia), and aircraft, 8%; and in South Asia—missiles made up 48% of the total (mostly from France), land armaments, 42% (Russia and China), and aircraft, 9% (United States and Germany). In all cases, the delivery of large naval craft accounted for less than 2% of the total.

U.S. Arms Control and Disarmament Agency

Released May 15, 1998

**TABLE V. Number of Major Weapons Delivered to Regions and Groups, By Supplier
and Weapon Type, Cumulative by Period — continued**

0 Nil or Negligible

- a Suppliers include the six largest exporters of major weapons, as well as other major groups.
- b Soviet weapon deliveries ended in 1991 in the main, although a small number were delivered in 1992 under prior-year agreement and are attributed here to Russia.
- c Air defense artillery includes weapons over 23mm. Field artillery includes mobile rocket launchers, mortars, and recoilless rifles over 100mm.
- d Major surface combatants include aircraft carriers, cruisers, destroyers, destroyer escorts, and frigates.
- e Other surface combatants include motor torpedo boats, subchasers, and minesweepers.
- f Other aircraft include reconnaissance aircraft, trainers, transports, and utility aircraft.

Country Rankings: 1996

As a statistical aid, the following tables show 167 countries of the world listed in descending order of their value for each of 4 absolute and relative arms transfer variables in 1996. The variable values are taken from Main Statistical Tables II, shown on this website under *WMEAT 1997*.

Users of these rankings should be aware that they are based on data whose accuracy is in many cases qualified as indicated by markings in Tables I and II signifying “not available,” “rough estimate,” or “estimate.” These tables and the Statistical Notes should be consulted in interpreting the rankings.

Entries marked “not available” (“NA”) are based on very rough estimates. While it is considered preferable to include countries with such data in the rankings rather than omit them, these estimates should be understood as having a wide range of error extending well beyond the level of neighboring countries in the rankings in most cases.

The variables, their abbreviations, and their data units are as follows:

Arms exports (AE)	Millions of dollars
Arms imports (AI)	Millions of dollars
Arms exports / total exports (AE/TE)	Percent
Arms imports / total imports (AI/II)	Percent

Country Rank in 1996, Arms Trade
